TECHNICAL SKILLS

Languages and Libraries: Java, Python, C#, JavaScript, Swift, React.js, MySQL, n8n

Tools and Frameworks: Terraform, Docker, LangChain, Kafka, Spring Boot, Django, PyTorch, Kubernetes, Azure, AWS

Certifications: Java SE 8 Programmer I (1Z0-808), Azure AI Fundamentals (AI-900), Azure Fundamentals (AZ-900)

WORK EXPERIENCE

Technology Associate — Synechron

Montreal, QC | Sept 2024 - Present

- Delivered an application from POC to client deployment within client infrastructure and security rules, implementing CI/CD pipelines with SAST, dependency scanning, and IAM controls, reducing ongoing maintenance effort by ~30%.
- Developed applied AI systems for the organization, including a supply-chain ESG analytics platform and a CV-to-RFP Agentic RAG engine using NLP, vector databases, and OpenAI APIs for real-time insights and similarity searches.
- Refactored microservices for cloud-agnostic deployment and provisioning, and built CI/CD pipelines with automated testing and security scans, cutting manual deployment interventions by over 25%.

Software Engineer — RapDev

Boston, MA | Nov 2025 - Present

- Migrated a SaaS cloud n8n instance to a self-hosted AWS infrastructure provisioned via Terraform, and built a Datadog dashboard with OpenTelemetry for deep observability, improving memory scalability and median uptime.
- Optimized existing n8n workflows, improving execution speed by streamlining execution paths and requiring versioning, tuning node configurations, and reducing failure rate by 50%.
- Designed and delivered automation tools (e.g., SOW generation, status reporting) by integrating Slack, Google, and Notion APIs, to reduce manual effort and increase operational efficiency, adopted by 75%+ of the organization.

Software Engineer — Sumitomo Mitsui Banking Corporation

New York, NY | Jan 2025 - May 2025

- Built an AI-powered document chatbot using a RAG architecture with Azure OpenAI, LangChain, pgvector, and semantic search, reducing document discovery time by ~15%.
- Developed a full-stack document management platform with advanced search, analytics, and agentic AI capabilities, integrating SEC EDGAR data for enhanced conversational workflows.
- Built an interactive chat interface component for message streaming, prompt input, and response rendering on React.

Mobile Developer Intern (iOS) — Sun Life Financial

Montreal, QC | May 2022 - Aug 2022

- Delivered production-ready iOS features such as Push Notifications and the 'Find an Advisor' option, improving performance and scalability, with the new functionality enabled by over 74% of active users.
- Collaborated in an Agile environment with designers and backend teams while conducting code reviews and load testing to ensure reliability and code quality.

Software Developer Intern — EDI Gateway

Montreal, QC | May 2021 - Aug 2021

- Developed an interactive dashboard to enhance metrics observability and log tracing on their EDI platform from the ground up, while identifying and resolving bugs in high-traffic data interchange systems to improve stability.

PROJECTS

SmartClass AI | *Personal Project*

June 2024

- Built a CNN-based facial expression recognition system, achieving 80%+ classification accuracy on validation data.
- Improved model fairness and reduced bias by 10% via dataset diversification and balanced sampling strategies.

Mental Health Alphabet | *McHacks 21*

Jan 2021

- Designed a mental health awareness web application and placed 1st while leading task delegation and development efforts, demonstrating leadership in the project's development and management.

EDUCATION

Concordia University | *B.S. in Computer Science*

Montreal, QC

National University of Singapore | *B.S. in Computer Science (Study Abroad Program)*

Singapore, SG

Dawson College | *Technical DEC (Career Diploma) in Computer Science*

Montreal, QC
